tools and buttons

Implement
detection engines

Structured reading

Workspace entirely
controlled during
the reading

Reporting modules

The platform to create your applications, your prototypes.

- ◆ **Customized:** rebrand the interface with your own identity
- ◆ **Flexible:** multiple activable tools, fitting your needs
- ◆ **Protect your assets:** intellectual property protection, built-in copy protection mechanisms
- ◆ **Integrability** within any system (PACS, RIS, EMR...): full component-based
- ◆ **Deploy your solution** through ZFP HTML5, thin or thick client, standalone system

Make it
your own
