**With 12 Sigma Technologies,
Intrasense strengthens its Chinese
strategy**

Intrasense announced today that it has signed a strategic partnership agreement with 12 Sigma Technologies. With this contract, the second signed by the Montpellier company since the beginning of the year, marks not only its entry into the field of artificial intelligence, but also the strengthening of its positions in the Chinese market. Our team increases the objective at € 1.2 per share.

**Avec 12 Sigma Technologies,
Intrasense renforce sa stratégie
chinoise**

Hier Intrasense a annoncé avoir signé un contrat de partenariat stratégique avec la société 12 Sigma Technologies. Avec ce contrat, le second signé par la société montpelliéraise depuis le début d'année, Intrasense marque non seulement son entrée dans le domaine de l'intelligence artificielle, mais aussi le renforcement de ses positions sur le marché chinois. Notre équipe augmente l'objectif du cours à € 1,2 par action.

**12 Sigma Technologies, a player in artificial
intelligence**

Using Myrian® Studio, the Myrian® platform development tool of Intrasense, 12 Sigma has developed "σ-Discover Lung", a computer-assisted diagnostic aid for the analysis of lung diseases. Specialist in artificial intelligence and

**12 Sigma Technologies, un acteur de
l'intelligence artificielle**

En s'appuyant sur Myrian® Studio, l'outil de développement de la plateforme Myrian® d'Intrasense, 12 Sigma a développé « σ-Discover Lung », un système d'aide au diagnostic assisté par ordinateur pour l'analyse des affections

neural networks, using Myrian® Studio, 12 Sigma has developed a solution to compile many lung images, in the order of one million. This method applies deep learning methods, or supervised learning, that consists in recognizing the content of an image, then comparing it in a trial-error or learning-classification process to different image banks. The 12 Sigma deep learning could detect lesions as small as 0.1% of an image, to allow early diagnosis of pathologies as well as the planning and monitoring of treatments.

pulmonaires. Spécialiste de l'intelligence artificielle et des réseaux de neurones, en utilisant Myrian® Studio, 12 Sigma a développé une solution permettant de compiler un grand nombre d'images pulmonaires, de l'ordre du million. Cette méthode utilise le « deep learning » (apprentissage profond) ou encore apprentissage supervisé, lequel consiste à reconnaître le contenu d'une image et à la comparer dans un processus d'essai-erreur ou apprentissage-classification à des banques d'images différentes. Le deep learning de 12 Sigma détecte des lésions aussi petites que 0.1% d'une image, il devrait ainsi permettre des diagnostics précoce de pathologies ainsi que la planification et le suivi des traitements.

China, one of Intrasense's target markets

With nearly a hundred hospital customers in China, 12 Sigma Technologies is set to become a major player in the sector. In addition, the company is also present on the American territory, with its San Diego base. Intrasense strengthened its presence in China, a market with great potential for the company (2nd health world market). Indeed, after the signing of a research cooperation agreement with MinFound Medical Systems, manufacturer of medical imaging equipment, on February 5th, 2018, this is the second contract signed with a Chinese company, this year. In addition, it is the sixth signed agreement resulting from a collaboration started using Myrian® Studio.

Valuation

The strategy put in place by Intrasense management, focused on key accounts, highlighting innovation via Myrian® Studio and Myrian® Imaging Layer, and on more industrial partners, should be fully operational by 2018. Aurgalys Value team increases the price target to € 1.2 per share.

La Chine, l'un des marchés cibles d'Intrasense

Avec près d'une centaine de hôpitaux clients en Chine, 12 Sigma Technologies est en passe de devenir un acteur majeur du secteur. De plus, la société est aussi présente sur le territoire américain à San Diego. Intrasense renforce ainsi sa présence en Chine, marché présentant un grand potentiel pour la société (2^{ème} marché de la santé mondiale). En effet, après la signature de l'accord de coopération de recherche avec MinFound Medical Systems, fabricant de matériel d'imagerie médicale, le 5 février 2018, il s'agit du sixième contrat signé avec une société chinoise cette année. Par ailleurs, c'est le second accord signé issu d'une collaboration débutée par l'utilisation de Myrian® Studio.

Valorisation

La stratégie mise en place par le management d'Intrasense, avec un focus sur les grands comptes, la mise en avant des innovations produits Myrian® Studio et Myrian® Imaging Layer, de nouveaux partenaires industriels, devrait s'exprimer pleinement en 2018. Notre équipe augmente l'objectif de cours à € 1,2 par action.
